

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name Code
Your Name Kai Hughes
Your Team Member's Name Kamyar Lakdash

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
 - 1B
 - 2B
 - 3
 - Bonus

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
 - 1A
 - 2A
 - 3

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

Worked well in having different iterations to work on I found that it was easy to distribute work in that manner. The biggest issues were just attaching both of the pieces of code and testing it in the main project. But it worked very smoothly when working together and working on them separately as both team members were fluent in their aspects.
