COMPENG 2SH4 Project – Statement of Contribution

Your Group Name ___Code_____

Your Name ___Kamyar Lakdashti_____

Your Team Member's Name ___Kai Hughes_____

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points. Answer: My contributions to the team was providing insights to our plan, debugging and regarding iteration doing iterations 1A and 2A, and making sure iteration 3 runs smoothly.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
   My project partner did iterations 1B and 2B, and did considerably great on doing different classes and making the final code work smoothly.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.
   Well, making sure that every piece of code works properly, and everything becomes well integrated with everything else was an important part of it. On top of that, debugging was an important and time taking part, and doing this project gave me great insight into how to tackle programming projects similar to these.
